### **What Makes You Come Alive?**

- Unlearning and learning constantly - I always feel we are evolving dynamically every moment. Most of the times the realizations needs me to unlearn what I know and learn the unknown.
- Listening to stories - All stories are special. Love them, love the fickle mind while listening to them and love the space where stories can be shared openly.
- Transitions - Every phase where I have to change the way I feel, think or speak is challenging and comes with soo much wisdom. It makes me see my shortcomings Soo clearly, gives me something to work upon and feel alive.

### **Pivotal turning point in your life?**

- Shifting away for my family for studies
- Finding a companion - Standing tall to the society/my family till I found hardik - someone who I could be with. Someone that made marriage doesn't look like a compromise, it looking like a journey we could grow together.
- My younger sisters marriage
- Leaving teacher's role at Fountainhead school- I loved my job, mentor, students but I grew up with a mindset that I will be someone's wife but I wanted to find my inner calling. Something to do for the self exploration. My mentor gave me his Blessing and promised me that he'd provide me with a degree of exploration once I am done. Guess I will never be done :)
